DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Species I, fig. 1-4, claims 1-6, 8-12, 14-16, 19, 21-27, 29, 31 in the reply filed on 8-3-04 is acknowledged. The traversal is on the ground(s) that the examiner has not shown burdensome search, separate status in the art or separate classification (the applicant cites MPEP § 803 & 808.02) and argues that the Election of Species requirement is therefore improper.

This is not found persuasive since the arguments do not appear to be germane to the issue of Election of Species. The examiner notes MPEP 808.01(a), which states "... it is not necessary to show a separate status in the art or separate classification.....". See MPEP 808.01(a).

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1, 9, 10, 11, 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Costanzo '323. Costanzo discloses a similar device comprising a(n):

- First conveyor belt (104) that includes a plurality of article-supporting rollers
- Second conveyor belt (106) arranged to run at a second velocity

Allowable Subject Matter

4. Claims 14-16, 19, 21-27, 29, 31 allowed.

5. Claims 2-6, 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
